Conference Aims
The fifth edition of the International Conference on the electrical engineering CIGE’2013 will be held from 17-19 November 2013 in Bechar-Algeria. The Objective of CIGE’2013 is to provide a convivial space and privileges discussions meetings and exchanges of results, between scientists, researchers, and industrials to present their latest researches on recent topics of electrical engineering and their Applications.
Best selected and presented proposals will be considered for publication in International journal. The rest of the accepted and presented papers will appear in the CIGE’2013 conference proceedings. An exhibition on electrical engineering applications will take place during the conference. Companies, industries and universities from over the world are encouraged to participate and present their products.

Conference Topics

Systems Analysis and Automatic Control
Linear Control Theory and Applications Mechatronics
Advanced Control and Robotics
Optimal and Stochastic Control/Intelligent Control

Power Electrical Systems
Electric Machine Modeling and Control
Power Converters Transformers
Electrical Drives
Power Electronics

Renewable Energy (Sources and Technologies)
Sustainable Development
Energy Production and Management
Solar Energy
Biomass Energy
Wind Energy

Signal Processing and Telecommunication
Signal Acquisition and restoration
Signal and Image processing
Multiple access
Information and coding
